DETAILED ACTION

Allowable Subject Matter

1. Claims 1-3 and 5-10 are allowed.
2. The following is an examiner's statement of reasons for allowance: It is agreed that the prior art of record fail to teach or suggest alone or in combination, the combination of the limitations: “a buffer generating a second signal based on the first signal from the temperature sensor and providing the second signal for the inverter controller; and an inverter controller which generates a control signal for controlling the inverter depending on the second signal of the buffer, wherein the voltage applied to the light source is increased based on the control signal, the second signal is a square wave having a first level and a second level and the second signal is at the first level when the sensed temperature is higher than a predetermined temperature and the second signal is at the second level when the sensed temperature is lower than a predetermined temperature” as claimed in claim 1; and “generating a second signal on the basis of the first signal based on the ; generating a third signal having a frequency depending on a state of the second signal; and changing the voltage applied to the light source responsive to the frequency of the third signal, the second signal is a square wave having a first level and a second level and the second signal is at the first level when the sensed temperature is higher than a predetermined temperature and the second signal is at the second level when the sensed temperature is lower than a predetermined temperature” as claimed in claim 9. It is for this reason in combination with all the other limitations in the independent claims 1 and 9, that claims 1-3 and 5-10 are allowable over prior art of record.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
